Maintenance Shutdown Boxes - Double Width With 6 Shelves

Throughout shutdowns, it is common for expensive parts and tools to go missing or be damaged due to incorrect storage.

Our range of maintenance shutdown boxes allows for the safe transport and secure storage of critical parts and tools.

These boxes are specifically designed to withstand the rigours of mining and construction environments.

→ Standard Features ◦

- Heavy duty galvanised steel construction provides optimum security for your equipment
- Weatherproof design to protect expensive parts and equipment during shutdowns
- Lockable front doors with securing chains when open
- Cambered roof for water run off
- Oversized fork pockets to allow for relocating with large forklift
- Fits one standard pallet inside on right hand side
- Six 227kg capacity sliding drawers with plastic storage tubs allow for allocating and organising of smaller parts
- Each drawer has an individual padbolt for securing during transport
