

Heavy-Duty  
Storage

Item code: TMSB202

## Maintenance Shutdown Boxes - 2 Pallet Wide

Throughout shutdowns, it is common for expensive parts and tools to go missing or be damaged due to incorrect storage.

Our range of maintenance shutdown boxes allows for the safe transport and secure storage of critical parts and tools.

These boxes are specifically designed to withstand the rigours of mining and construction environments.

### → Standard Features

- Heavy duty galvanised steel construction provides optimum security for your equipment
- Weatherproof design to protect expensive parts and equipment during shutdowns
- Fits two standard pallets inside
- Lockable front doors with securing chains when open
- Oversized fork pockets to allow for relocating with large forklift
- Lockable
- Increase Efficiency
